# ESTIMATING MATERIALS

## Flaking Example

$$\begin{array}{lcl}
 \text{AREA YOU FLAKE} & \rightarrow & 500 \text{ sqft} \\
 & \frac{\quad}{\quad} & \\
 \text{400 FORMULA} & \rightarrow & 400 \\
 & & = 1.25 \leftarrow \text{UNIT BOX QUANTITY} \\
 & & \\
 & & 1.25 \times 55 \text{ lbs.} = 68.75 \text{ lbs.} \leftarrow \text{POUNDS OF FLAKE NEEDED} \\
 \text{POUNDS PER BOX} & \rightarrow & \uparrow \\
 & & \text{You will recover aprox 30-40\% of material}
 \end{array}$$

500 sq ft is the sq ft of the area you're flaking

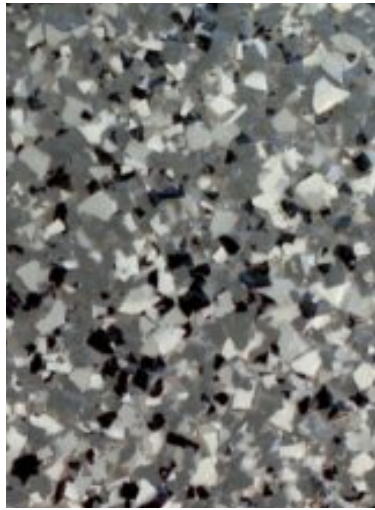

You divide your sq ft area by 400 **formula** and you will get a unit box qty times 55 lbs per box = how many lbs of flake you will need

# MIXING INSTRUCTIONS

All mixing is 1/1 equal parts

Standard mix batches start at 48oz of Part A and 48oz of Part B

**Total batch of 96 oz**

For adjustment size of all batch size to be made as 1/1 equal parts

***All changes in batch size adjust you xylene proportionately***

## **First coat:**

Add 10 oz xylene to 96 oz mix

## **Color coat:**

Add 5 oz xylene to 96 oz mix

## **Top clear coat:**

Add 10 oz xylene to 96 oz mix

## **Mixing:**

Add part A and B in mix container and then xylene.  
Mix for 1.5 minutes.

**DO NOT EXCEED 2 MINUTES!**

**First coat:** Normally clear or you can add some color pigment into clear base coat to help with better color for 2nd coat of color.

Add A and B together in equal amounts and roll material down.

**Second Coat:** Color coat mix with pigment. Mix in separate bucket part A 1 gal of clear polyaspartic & 10 oz of pigment. Add part B in equal parts for mix. Roll material down.

**Top Clear coat:** Add equal amounts of parts A and B mix. Squeegee onto floor, back roll materials in both directions for final finish.

# HUSQVARNA EQUIPMENT: GRINDERS

**Sales Price**  
**\$11,800**

Includes Weights

## PG 540

A powerful, compact and versatile planetary floor grinder perfect for smaller jobs. Available in both single phase and three phase. It combines a smart compact design for easy transportation with real work-horse performance and sheer grinding power. It's easy to handle, tilt and operate with optional adjustable weights for extra grinding pressure. Suitable for all applications: floor prep, grinding and polishing.

List Price \$13,000.00

**Sales Price**  
**\$22,999**

Add Weights \$1800

## PG 690 Propane

The propane drive makes your operation independent of electrical access and makes the PG 690 Propane the perfect choice for large outdoor concrete slabs. The new electric fuel injection system cuts fuel consumption and reduces the risk of freezing - while the exhaust catalyst makes for even lower emissions. Key components are sealed against dust and slurry for maximised reliability and low maintenance.

List Price \$26,750.00

Plus Tax and Shipping

## HTC EQUIPMENT: GRINDERS

**Sales Price**  
**\$3884**

### HTC 280 110V - Edge Grinder

The HTC 280 is a small, agile floor grinder with a 2.2 kW motor that's just right for simpler floor stripping or grinding. The grinder can also be easily reconfigured for edge grinding. The HTC 280 is especially good for smaller surfaces where concrete, for example, needs to be evened out, or where a coating must be removed (paint, putty, epoxy, etc.). The motor and chassis can be easily separated, and the chassis is collapsible for easy handling and transport. The grinder even has a digital time counter.

Plus Tax and Shipping

# HUSQVARNA EQUIPMENT: VACUUMS

**Sales Price**  
**\$4300**

## **S 36**

A very powerful single-phase HEPA dust extractor to match small to mid size scarifiers, grinders, shot blasters and handheld power tools. Three large, commercial-grade vacuum motors provide plenty of power. Equipped with three independently tested and certified HEPA H13 filters and a massive cone-shaped pre-filter with over 4.5 m<sup>2</sup> of media. This results in superior dust collection, even of fine sanding and gypsum dust.

List Price \$4,871.00

**Sales Price**  
**\$7,500**

## **S 36 Propane**

A very powerful propane HEPA dust extractor to match small to mid size electric, propane or other petrol grinders, shot blasters and shavers. This professional dust extractor is designed to meet strict demands. Features include Jet Pulse pre-filter cleaning and air-flow manometer for filter control. The Longopac® bag hose system ensures simple, dust-free bag changes.

List Price \$10,345.00

**Plus Tax and Shipping**

### DT Series

For unparalleled transition. The revolutionary way to achieve the perfect floor in less time without compromising on quality.

[Read more](#)

### DX Series

**Diamond Xpress Series**  
Diamond Xpress is a grinding system for marble, terrazzo and other similar types of floors. Thanks to advanced diamond and composite technology, the system requires no water.

[Read more](#)

### SUPERPREP Series

Tools tougher than any job. The series combines the entirely new EZ PREP series, along with the well-known T-Rex® and Ravager tools, both of which have been further developed and improved.

[Read more](#)

### S Series

**S-Series for soft concrete and abrasive surfaces**  
Soft concrete, asphalt or other porous materials are often very abrasive and tools risk being worn out pretty quickly if not chosen wisely.

[Read more](#)

### EZ FP Series

Our FP-series is an excellent polishing tool that is very appreciated for its outstanding performance in creating a high gloss.

[Read more](#)

### EZ REP Series

Our REP-series is a grinding and polishing tool specifically developed for wet processing of natural stone such as marble, terrazzo and limestone.

[Read more](#)

### M Series

M-Series is specifically developed for medium hard concrete (Moh's scratch test between 3 and 5). The M-Series can in addition to concrete be used for natural stone and terrazzo and has a high removal capacity.

[Read more](#)

### H Series

H-Series is specifically developed for hard concrete (Moh's scratch test between 5-7). For power troweled surfaces the H-series could be a good choice. The H-series can also be suitable for processing of natural stone such as marble and terrazzo.

[Read more](#)

### SR Series

The SR tools are mainly used in the HTC Superfloor™ process. The new SR series are updated with a completely new formula and a new design which gives the tools an enhanced performance and output.

[Read more](#)

### BB Series

**New Super Resin tools with extended life.**  
The main benefit of these tools is the extended life. They also leave a more uniform scratch pattern compared to other tools which speeds up the grinding process.

[Read more](#)

### X Series

X-Series is specifically developed for extremely hard concrete (Moh's scratch test between 7-9). Grinding extremely hard concrete can provide challenges and the X-series is perfect for these type of tricky situations.

[Read more](#)

### XX Series

For extremely hard concrete, when nothing else can make the cut! The XX Series consists of unique diamond tools for the hardest concrete and where speed is essential.

[Read more](#)

### Fenix

Our FENIX series is perfect for grinding and polishing of cementitious toppings (overlays or screed) and concrete. Thanks to its flexible pads it is also a good problem solver in case of minor low spots when grinding and polishing concrete.

[Read more](#)

### Tool Rings

**For concrete grinding**  
The HTC tool rings are equipped with our S, M or X single segments and is an alternative to using our single segment EZ wings.

[Read more](#)

### SGW Series

**HTC Plastic rings - For wet grinding of natural stone floors with uneven surfaces**  
The SGW-rings are especially efficient when it comes to wet grinding of uneven placed floor tiles.
